

Pure Evolution

With its sleek column-like leg designs, the Pure Evolution range offers itself as an elegant and expertly crafted choice of office furniture.

Pure Evolution is a range infused with the spirit of innovation: desks are designed for assembly by just one person and without specialised tools. This is made possible thanks to the lightweight self-supporting legs, practical slot-in crossbeam and the use of thumb screws to secure the uprights to the worktops.

"A singular technologically advanced yet simple range, Pure Evolution is a definitive expression of modern workstation design."

ROMAIN BOURBOULON Marketing Director

Pure Evolution is a range of office systems offering maximum adaptability. Fixed and height-adjustable cylindrical legs are available in 'Y' and 'L' shaped dispositions. A branched base structure provides a further practical configuration solution for meetings.

Technical specifications

1 25 mm thick high-density particle board, covered with a sheet of decorative melamine on both sides of the top. Edges protected by a 2 mm thick strip of ABS matching the top.

2 Worktops feature cable ports, composed of an outer ring (ø 8cm) incorporated in the worktop and 'eol' design snap-in cap (ø 6 cm).

3 Fixed 'I' shaped legs composed of a metal tubular bar at the top designed to receive knurled knobs (for easy tool-free securing to the worktop), a circular-section tubular metal bracket ø 70 mm to which are welded sheet metal feet fitted with adjustable stabilizers. Worktop height: 73.5 cm.

4 Fixed 'L' shaped legs, with identical design to the 'I' shaped legs. Worktop height: 73.5 cm.

5 Optional vertical cable management column for fixed legs, in sheet metal 10/10 mm thick. Fixed with hooks to the inside of the legs. Cables can be fed through both upper and lower extremities. A version that attaches to the worktops is also available for adjustable leg models.

6 Tubular-section crossbeam (50 x 30 mm) ranging from 80 to 180 cm in length, designed for mounting on legs. Tool-free assembly by slotting the extremities into respective housings welded to the leg brackets.

7 Height-adjustable 'I' shaped leg composed of a metal tubular bar at the top, a telescopic circular-section tubular metal bracket (male/female ø 60/70 mm) that slides within an injection moulded ABS ring. Legs are locked into position at desired height by means of 2 M6 screws. Worktop height: from 62 to 86 cm.

8 Height-adjustable 'L' shaped legs, with identical design to the 'I' shaped adjustable legs. Worktop height: from 62 to 86 cm.

9 Cable trough designed to be fitted to the crossbeam, with the purpose of concealing electrical trailing sockets and cables. Made from 10/10 mm sheet metal, height 10 cm and ranging in length from 90 to 130 cm.
