

# Twin Distal

---

TWIN DISTAL is a dynamic and contemporary office furniture range, fusing practicality and aesthetic design to produce highly flexible and adaptable work space configurations: from the basic individual workstation, to managerial desk solutions or the more versatile teamwork-orientated shared structure workstations.

*"TWIN DISTAL is an ideal choice for teams engaging in project work, the range lends itself perfectly to efficient collaboration in a harmonious work environment."*

**MAGALIE JAURON** Product Manager – System furniture

**Storage and extension**  
units to complement  
to the workstations

TWIN DISTAL allows shared structure configurations: a shortened base leg is incorporated as a shared support for adjoining worktops, facilitating movement between workstations and collaborative work.

# Standards

## Technical specifications

**1** High-density fibre board worktop, 25 mm thick, with a decorative melamine sheet on both sides of the top. 2 mm thick ABS edge banding, matching the worktops.

**2** Tops feature cable ports, made from injection moulded ABS (ø 80 mm).

**3** Fixed « I » shaped legs composed of a pressed sheet metal top plate, uprights in folded sheet metal with removable sheet metal clip-on leg panels, curved design steel base element fitted with elliptical ABS end caps and adjustable stabilizer feet. Cables are channelled within the leg structure behind the removable panels, and exit through openings in the upper and lower extremities. Worktop height: 73.5 cm.

**4** Fixed « L » shaped legs, with identical design to the « I » shaped legs. Worktop height: 73.5 cm.

**5** Metal modesty panel, attaches directly to « L » shaped leg structure. Made from sheet metal 0.7 mm thick, with 2 grooves running the length of the panel for additional structural rigidity. Height 375 mm. Epoxy coating matching the « L » shaped leg finish.

**6** Shared leg with shortened base designed to support 2 adjoining worktops: a cost-effective and ergonomic solution. Available in fixed « I » shaped leg and fixed « L » shaped leg versions. Identical design to the « I » and « L » shaped legs except for the shortened base element (475 mm) facilitating greater freedom of movement for users. Leg clip-on leg panels are shorter than on the standard legs, providing an opening to allow cables to be fed uninterrupted between end sections.

**7** Height-adjustable « I » shaped legs composed of a pressed sheet metal top plate, centrally positioned upper pillar and lower pillar housed in a telescopic folded sheet metal panelling. Features a curved design steel base element fitted with elliptical ABS end caps and adjustable stabilizer feet. Cables are channelled within the leg structure behind the removable panels, and exit through openings in the upper and lower extremities. Worktop height: from 63.5 to 86 cm, adjustable at 2 cm intervals.

**8** Height-adjustable « L » shaped legs, with identical design to the height-adjustable « I » shaped legs. Worktop height: from 63.5 to 86 cm, adjustable at 2 cm intervals.

**9** C-shaped folded sheet metal crossbeam, 1 mm thick with opening on user side. Fixed element, secured with screws to « I » and « L » shaped legs. 2 circular openings (ø 60 mm each) allow cables to be fed through from the worktop to the desk structure. Facilitates concealing of numerous electrical trailing sockets and cables. Grey aluminium epoxy finish. Dimensions: height 95 mm and depth 60 mm.
